

ASIAN E+

ENERGY EFFICIENT TUBELIGHT SYSTEM

Asian Electronics Ltd is well known for its innovations and marketing strategies in energy efficient products and systems. Employing the new generation T-5 fluorescent lamp, latest Electronic Control Gear (ECG) Technology, unique photometry and features, Asian E+ offers a Lighting Solution for turning your costs into profit both for existing and new installations.

4 Fluorescent Tubular Lamp FTL

FTL	dia	wattage	flux	efficacy
	mm	W	lumens	lm/w
TL Standard (T-12)	36	40	2450	61
TL Standard (T-8)	25	35	2425	67
TL Super (T-8)	25	35	3250	90
TL Super (T-5)	15	28	2900	104

Global Growth of T5 Lamp

Lighting loads constitute generally 17% of electrical load in an industrial / commercial environment. E+ helps in reducing energy costs up to 45%. It is a comprehensive lighting system and is available in both Retrofit and Stand Alone models. The E+ range offers a host of innovative, energy efficient and economically beneficial lighting solutions.

ASIAN E+ RETROFIT (FOR EXISTING INSTALLATIONS)

T-5 lamps are shorter in length than the conventional T-8 (35W) / T-12 (40W) lamps and therefore cannot fit into existing fittings. To avail the benefits of T-5 lamp system a consumer would need to change the total fitting, incurring additional costs for wiring and labour.

E+ Retrofit Model

Asian E+ Retrofit makes available the benefits of T-5 lamps to existing consumers with no additional costs. It provides a straight and easy replacement of the conventional FTL without any change in fixture and wiring.

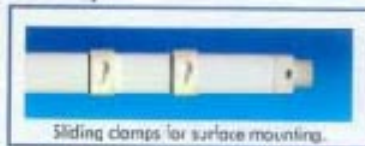

E+ Retrofitted in existing fixture

ASIAN E+ STAND ALONE (FOR NEW INSTALLATIONS)

Stand Alone Model is virtually a FTL lighting system by itself. It is light, slim and compact. An aesthetic design and engineering grade plastic body makes it appealing. Sliding mounting clasps enable easy installation.

It is also appropriate for cost effective change of existing old lighting fixtures.

Sliding clasps for surface mounting.

E+ Stand Alone Model

Efficiently lighting up the world
